

JOB DESCRIPTION
MASA Healthcare Staffing & Recruiting Services

Position Title: Specialist/Consultant-Medical Pathology, Lab

Location: Arabian Gulf

Summary:

Medical pathologists do not treat patients of their own, they do laboratory tests to diagnose disease in the patients of other physicians. They perform tests on body tissues, secretions, and other specimens to see whether a disease is present and to determine its stage. They evaluate the extent of the disease, estimate the course it is likely to take, and suggest ways to treat the disease. Their patients range in age from adolescents to the elderly. They are required to be able to apply medical pathological knowledge, intervention, and planning, conduct the appropriate documentations and evaluation, and direct other medical supporting staff when needed.

Supervisory Responsibilities:

Direct and supervise dental supporting personnel such as dental assistant or nurses

Essential Responsibilities:

Time%

- 85% 1. Direct patient Care
- 5% 2. Prepare appropriate documentation of related to patient care
- 5% 3. Provide patient and family education for continued patient improvement and understanding
- 5% 4. Contribute the company’s mission and meetings

Additional Responsibilities:

Contribute to department’s continuous quality improvement and productivity by offering suggestions for effectiveness and efficiency.

Education:

- 1. Bachelor degree in Medicine and Master degree in Medical Pathology/Lab Medicine
- 2. Current license or eligibility as a dentist according to the state requirements

Experience:

- 5 Years experience is required and European fellowship or U.S training is preferred

Knowledge, Skills, Abilities and Other Characteristics Required:

- Be able to interact in team environment setting
- State license
- Good English skills

Job Context:

Physical exertion required in assisting patients with their treatment. In some cases, Frequent kneeling, stooping, bending, walking, and standing for long periods also are part of the job. The working condition depends on the setting. Dentists can work in a variety of settings such as ambulatory care, in-patient acute care, or out-patient office.
